Uniqueness of the topic

An in depth comparative analysis on cross-college placements to identify hidden trends and patterns to prepare ourselves better (has not been done before). We incorporate **Cross-Institutional Comparative Study** and **Temporal Trend Analysis** into our studies. The project directly translates into actionable insights for students, helping them identify skill gaps.

Your Learning goal

We aim to use this project to grasp the concepts taught in classes and apply it accordingly to real world data(with its challenges)

We aim to analyze and understand the underlying patterns and trends that appear during placement seasons and use it to better tackle our own placements.
